Tired of researching coins?

Web3 platform powered by AI

Introducing
FinRizz

FinRizz fetches real time prices, and sentiment regarding a stock. While validating the actual users and the true nature of the market, FinRizz aids you in the decision making process.

Bringing in a telegram bot for usability.

Multi–Agent AI System

Four Agents: Discovery, Whale Tracking, Market Data, Financial Analysis to provide comprehensive, actionable investment intelligence.

The Graph Substreams

Provides real–time on–chain data by indexing large transfers and holder concentrations for the Whale Tracking Agent.

Pyth Network Oracles

Delivers real–time, reliable market price feeds for accurate price discovery and calculation of market metrics.

OG Network (Testnet/Mainnet)

Used for fast, cheap transactions to enable the micro–payment/credit–based analysis system and smart contract deployment (e.g, FinRizzCredits).

FireCrawl & X/Reddit

Analyse the sentiment of the data from X / Reddit using FireCrawl

Telegram

Utilize a bot from telegram to provide a easy chat based interface and opens doors for future automations

Thank You
